Research Interests

I specialize in the fields of numerical analysis, optimization, and partial differential equations (PDEs). My research interests are diverse and include optimal control, model order reduction, mathematics modelling, mathematical biology, space-time numerical methods and iterative solvers for PDEs particularly multigrid methods and domain decomposition methods.

Work Experience

Post-doctorat contract October 2021 - present
Section of Mathematics, University of Geneva, Geneva

Topic: Domain Decomposition methods for PDE-constrained optimal control problems
Keywords: elliptic optimal control, parabolic optimal control, convergence analysis, Dirichlet-Neumann method, Neumann-Neumann method
Collaborators: Martin J. Gander, Section of Mathematics, University of Geneva, Bastien Chaudet-Dumas, Section of Mathematics, University of Geneva

Instructor contract October 2018 - September 2021
Sorbonne University, Paris
192h of teaching

Doctoral contract October 2018 - September 2021
Laboratory Jacques-Louis Lions, Sorbonne University, Paris

Topic: Lagrangian approaches for modelling and optimization of hydrodynamic-photosynthesis coupling
Keywords: microalgae, photobioreactor, raceway pond, Saint-Venant model, Han model, nonlinear adaptive control, resource allocation, permutation, topography, photoinhibition
Collaborators: Jacques Sainte-Marie, INRIA Paris, team ANGE, Joel Ignacio Fierro ulloa, INRIA Sophia Antipolis, team BIOCORE

Research Internship March 2018 - September 2018
INRIA Paris, team ANGE, Paris

Topic: Model order reduction for Burgers' equation
Keyword: reduced basis, Burgers's equation, characteristic equation, POD, EIM, Greedy algorithm, a posteriori estimation
Supervisors: Julien Salomon, INRIA Paris, team ANGE, Jacques Sainte-Marie, INRIA Paris, team ANGE

Education

Sorbonne University, Paris, France 2018 - 2021
Ph.D. degree in Applied mathematics
Defended September 29th 2021 at Laboratory Jacques-Louis Lions, UMR 7598, Paris

Title: Lagrangian approaches for modelling and optimization of hydrodynamic-photosynthesis coupling

Supervisors:

Julien Salomon	Senior researcher at INRIA Paris, team ANGE
Olivier Bernard	Senior researcher at INRIA Sophia Antipolis, team BIOCORE

Jury:

Referees	Benoît Chachuat	professor at Imperial College London
	Yannick Privat	professor at University of Strasbourg
President of Jury	Florence Hubert	professor at Aix-Marseille University
Examiners	Céline Grandmont	Senior researcher at INRIA Paris
	Camille Pouchol	associate Professor at University of Paris
	Magali Ribot	professor at University of Orléans
Invited	Martin J. Gander	professor at University of Geneva

Sorbonne University, Paris, France 2016 - 2018
Master degree in Mathematics and applications

University Claude Bernard Lyon 1, Lyon, France 2015 - 2016
Bachelor degree in Mathematics and applications

University Savoie Mont Blanc, Chambéry, France 2013 - 2015
First and second year of Bachelor in Mathematics

Publications

International peer-reviewed journal papers

New time domain decomposition methods for parabolic control problems II: Neumann-Neumann algorithms, with Martin J. Gander, In preparation (2023)

From the calibration viewpoint, what do we know about the Haldane model?, with Nan Pan and Olivier Bernard, In preparation (2023)

New time domain decomposition methods for parabolic control problems I: Dirichlet-Neumann and Neumann-Dirichlet algorithms, with Martin J. Gander, Submitted (2023)

Theoretical growth rate of microalgae under high/low-flashing light, with Olivier Bernard and J. Ignacio Fierro U., Journal of Mathematical Biology, 86(48):1-32 (2023)

Topography optimization for enhancing Microalgal growth in raceway ponds, with Olivier Bernard, Jacques Sainte-Marie and Julien Salomon, Submitted (2022)

Optimization of mixing strategy in microalgal raceway ponds, with Olivier Bernard and Julien Salomon, International Journal of Robust and Nonlinear Control, 1-22 (2022)

Optimal optical conditions for Microalgal production in photobioreactors, with Olivier Bernard, Journal of Process Control, 112:69-77 (2022)

Internationales peer-reviewed conferences proceedings

Dirichlet-Neumann and Neumann-Neumann Methods for Elliptic Control Problems, with Martin J. Gander, accepted In the 27th International Domain Decomposition Conference (2023)

Mixing Strategies Combined with Shape Design to Enhance Productivity of a Raceway Pond, with Olivier Bernard and Julien Salomon, In 11th IFAC SYMPOSIUM on Advanced Control of Chemical Processes, 54(3):281-286 (2021)

Optimizing microalgal productivity in raceway ponds through a controlled mixing device, with Olivier Bernard and Julien Salomon, In 2021 American Control Conference, 640-645 (2021)

Controlling the bottom topography of a microalgal pond to optimize productivity, with Olivier Bernard, Jacques Sainte-Marie and Julien Salomon, In 2021 American Control Conference, 634-639 (2021)

Organization

Mini-symposium at *45ème Congrès National d'Analyse Numérique (CANUM2022)* under the title **Méthodes parallèles pour les équations aux dérivées partielles,** with Bastien Chaudet-Dumas and Martin J. Gander, Evian-les-Bains, 2022

Mini-symposium at *27th International Domain Decomposition Conference (DD XXVII)* under the title **Convergence analysis of non overlapping domain decomposition methods,** with Bastien Chaudet-Dumas, Pragues, 2022

Research school on *Iterative Methods for Partial Differential Equations 2023 (IMPDE2023)* with Bastien Chaudet-Dumas and Lucas Perrin, Paris, 2023. Website: https://impde2023.sciencesconf.org

Mini-symposium at *28th International Domain Decomposition Conference (DD XXVIII)* under the title **Transmission conditions in domain decomposition methods and optimal control problems,** with Martin Jakob Gander, KAUST, 2024

Grant

Project BOUM grant of 1000 euros from the SMAI (French Society of Industrial and Applied Mathematics) with Bastien Chaudet-Dumas and Lucas Perrin

Parrainage of INRIA PARIS grant of 1000 euros with Bastien Chaudet-Dumas and Lucas Perrin

Teaching

University of Geneva

2023-2024	Analysis II - Real Analysis	Bachelor second year	28h
	Mathematics for computer science	Bachelor first year	28h
	Animator of Mathscope		
2022-2023	Analysis II - Real Analysis	Bachelor second year	28h
	Numerical Analysis	Bachelor second year	28h
	Animator of Mathscope		
2021-2022	Analysis II - Real Analysis	Bachelor second year	56h
	Numerical Analysis	Bachelor second year	28h

Sorbonne University

2019-2020	Mathematics for scientific study I	Bachelor first year	108h
	University certificate of return to higher education for exiled persons	Bachelor preparation	10h
2018-2019	Analysis and Algebra for science	Bachelor first year	36h
	Numerical methods for differential equations	Bachelor third year	28h
	University certificate of return to higher education for exiled persons	Bachelor preparation	14h

Supervison

Dylan Machado, co-supervised with Julien Salomon, 05.2022-08.2022, Bachelor thesis

Joel Ignacio Fierro ulloa, co-supervised with Olivier Bernard, 06.2021-09.2021, Master thesis

Joel Ignacio Fierro ulloa, co-supervised with Olivier Bernard, since 10.2021, Ph.D thesis

Skills

Languages:	Chinese, French, English
Computer skills:	MATLAB, Python, Tex, Git, Maple, C++, HTML, CSS
Operation systems:	MacOS, Linux, Windows
